Savings Accounts and EagleCash

1. Soldiers enrolling in the EagleCash program that would like to link their **savings** account to their EagleCash Card should first check with their bank to ensure that Automated Clearing House (ACH) debits and credits can be performed on their **savings** account.
2. Some individuals who linked a **savings** account to their EagleCash Card may have had their EagleCash Card temporarily suspended or “warmlisted” because their savings account will not accept ACH debits and credits.
3. If your EagleCash Card has been “warmlisted” because of a **savings** account issue, you will need to stop by the local finance office and change the bank account that is associated with your EagleCash Card.
4. Individuals who need to change their banking account information will need to complete a new DD Form 2887, Navy/Marine and EagleCash Enrollment and Authorization Agreement at their local finance office.
5. For more information regarding this and other finance questions, call or stop by your local finance office.
